| Barclays Global Aggregate CAD Hedged | 100.0 | 100.0 |

[1] Risk is defined as standard deviation which measures the variability of returns from the average. [2] Canadian bonds are represented by the FTSE Canada Universe Bond Index. [3] Global bonds are represented by the Bloomberg Global Aggregate CAD Hedged. [4] Correlation is a statistical measure that determines how assets move in relation to each other. Benchmarks are not hedged to the Canadian dollar. [5] High Yield bonds are represented by the Barclays Global High Yield TR USD Index. [6] Inflation Linked bonds are represented by the Barclays Global Inflation Linked TR USD Index.
[7] Global currencies are represented by the Barclays Global Aggregate TR USD Index. [8] Emerging Markets are represented by the Barclays EM USD Aggregate Index.
[9] Source: IPE "Top 500 Asset Managers" published in June 2025, based on assets under management as at December 2024. [10] ESG ratings applied to corporate bonds in portfolio.
[11] The Portfolio will seek to pay a monthly distribution consisting of income and/or return of capital of a fixed amount per unit determined as of December 31 in the previous year. The distribution policy is reviewed annually.
[12] Weighted average yield to maturity represents an average of the YTM of each of the bonds held in a bond fund or portfolio, weighted by the relative size of each bond in the portfolio. It's important to note that investments carry inherent risks, and yields can fluctuate based on market conditions.
