5. S = SOFR (Secured Overnight Financing Rate), is a broad measure of the cost of borrowing cash overnight collateralized by Treasury securities. The SOFR includes all trades in the Broad General Collateral Rate plus bilateral Treasury repurchase agreement (repo) transactions cleared through the Delivery-versus-Payment (DVP) service offered by the Fixed Income Clearing Corporation (FICC), which is filtered to remove a portion of transactions considered "specials". Note that specials are repos for specific-issue collateral, which take place at cash-lending rates below those for general collateral repos because cash providers are willing to accept a lesser return on their cash in order to obtain a particular security. The SOFR is calculated as a volume-weighted median of transaction-level tri-party repo data collected from the Bank of New York Mellon as well as GCF Repo transaction data and data on bilateral Treasury repo transactions cleared through FICC's DVP service, which are obtained from the U.S. Department of the Treasury's Office of Financial Research (OFR). Each business day, the New York Fed publishes the SOFR on the New York Fed website at approximately 8:00 a.m. ET.
6. Asset Based Loan relates to a position in an SPV comprised of a diversified pool of 1st Lien middle-market term loans with each underlying position constituting ~5% of the aggregate SPV holdings. The 100% shareholding of SPV lies with Sagard. The portfolio generates a levered return of ~12.5% for the Fund.
7. NAV per unit post distribution.
8. The Annualized Distribution Yield calculation is based on the distribution per unit for November 2025 multiplied by 12. Calculation will be based off actual distributions paid once the initial 12-month period has elapsed.
9. Distributions are expected monthly, though not guaranteed.
10. The Access Fund's cash redemption of Units will be limited to the amount indirectly accepted by the Fund.
11. Plus applicable taxes.
