Quarterly Commentary

The Sagard Private Credit Fund, which launched in September 2024, continues to scale in line with our expectations. All portfolio holdings are performing as anticipated, delivering steady coupon payments and distributions. The current credits in the portfolio are on a cash-accrual basis, containing a 0% Payment-in-Kind (PIK) component. The addition of alternative asset classes (e.g., asset-based lending) has helped generate relatively low risk and high returns for the book. The strong 2024 performance reflects the resilience of our direct lending strategy and rigorous underwriting standards, which continues to support stable cash flows and attractive risk-adjusted returns.

Sagard believes its investment pipeline remains dynamic and diversified across industries. The 2025 pipeline continues to show strong momentum, with deals in the 650+ spread range. We believe this momentum positions the Fund for sustained growth and enables Sagard to capitalize on attractive opportunities within the current market environment.

Footnotes

1. As of December 31, 2024. Face Value funded on the Initial Investment date, gross of any fees. Presented in aggregate of all advances.
2. As of December 31, 2024. Loan-to-value (LTV) are based on the portfolio's debt investments. Does not include recurring revenue loans.
3. As of December 31, 2024. Reflects weighted average Senior Debt to EBITDA.
4. Debt investments are shown as "Doing Business As" names. Please refer to the 10-K or 10-Q for actual borrower names. Holdings are subject to change and there is no assurance any investment will remain in our portfolio.
5. S = SOFR (Secured Overnight Financing Rate), is a broad measure of the cost of borrowing cash overnight collateralized by Treasury securities. The SOFR includes all trades in the Broad General Collateral Rate plus bilateral Treasury repurchase agreement (repo) transactions cleared through the Delivery-versus-Payment (DVP) service offered by the Fixed Income Clearing Corporation (FICC), which is filtered to remove a portion of transactions considered "specials". Note that specials are repos for specific-issue collateral, which take place at cash-lending rates below those for general collateral repos because cash providers are willing to accept a lesser return on their cash in order to obtain a particular security. The SOFR is calculated as a volume-weighted median of transaction-level tri-party repo data collected from the Bank of New York Mellon as well as GCF Repo transaction data and data on bilateral Treasury repo transactions cleared through FICC's DVP service, which are obtained from the U.S. Department of the Treasury's Office of Financial Research (OFR). Each business day, the New York Fed publishes the SOFR on the New York Fed website at approximately 8:00 a.m. ET.
6. Asset Based Loan PF relates to the holding in a SPV that constitutes entirely of diversified pool of 1st Lien middle-market TL with each underlying position constituting ~5% of the aggregate SPV holdings. The 100% shareholding of SPV lies with Sagard. The portfolio generates a levered return of ~12.5% for the Fund.

Important Information

There will be restrictions on transferring interests in the Access Fund, investments may be leveraged, and the investment performance may be volatile. Before deciding to invest in the Access Fund, prospective investors should read the Access Fund Offering Memorandum and pay particular attention to the risk factors contained therein. There are important differences between the Access Fund and the Underlying Fund described in this Fact Card. All information relating to the Underlying Fund and its terms is qualified in its entirety by the final form legal and constitutional documents relating to the Underlying Fund, as supplemented, restated or amended from time to time. In particular, it should be noted that various qualifications and considerations attached to the information presented in the final form legal and constitutional documents have not necessarily been reproduced in this Fact Card and, accordingly, prospective investors contemplating the purchase of an interest in the Access Fund should attach correspondingly qualified considerations to such information. The terms of the Underlying Fund may be subject to continuing negotiation with prospective investors and may be different from those summarized herein or otherwise contained in any other materials provided to the Recipient by the Manager.

The Access Fund and the Underlying Fund impose, as applicable and described in their constituent documents, management and/or administrative fees, custodial, accounting and other servicing fees, carried interest or performance fees (in the case of the Underlying Fund) and other expenses that will reduce returns. The fees and expenses charged in respect of an investment in the Access Fund and in the Underlying Fund may be higher than the fees and expenses of other investment alternatives and will offset profits or increase losses. Investors should have the financial ability and willingness to accept the risk characteristics of the Access Fund's investments. Potential conflicts of interest may arise between the Manager and the Access Fund interest holders, as described more fully in the Access Fund Offering Memorandum.

In considering any performance data contained in this Fact Card, you should bear in mind that past or targeted performance is not indicative of future results, and there can be no assurance that the Access Fund or the Underlying Fund will achieve comparable results.

Prospective investors should also bear in mind that past or targeted portfolio characteristics are not indicative of future portfolio characteristics and there can be no assurance that any fund will have comparable portfolio characteristics or that target portfolio characteristics will be achieved. Nothing contained herein should be deemed to be a prediction or projection of future performance of the Underlying Fund or the Access Fund. The information in this Fact Card may contain forward-looking statements regarding future events, targets or expectations regarding the Access Fund and the Underlying Fund or the strategies described herein, and is only current as of the date indicated. There is no assurance that such events will occur or targets will be achieved. The information in this Fact Card, including statements concerning financial market trends, is based on current market conditions, which will fluctuate and may be superseded by subsequent market events or for other reasons. Due to various risks and uncertainties, actual events or results or actual performance may differ materially from those reflected or contemplated in such forward-looking statements, and there can be no assurance that any unrealized investments used to calculate the return information set forth herein will ultimately be realized for their assumed values. As a result, investors should not rely on such forward-looking statements. General discussions contained within this Fact Card regarding the market or market conditions represent the views of the Manager, if set forth in the iCapital Wrapper, or of the Underlying Manager and its affiliates if set forth in the Underlying Fund fact card. Nothing contained herein is intended to predict the performance of any investment. There can be no assurance that actual outcomes will match the assumptions or that actual returns will match any expected returns. The information contained herein, unless otherwise indicated, is subject to change, and the Manager does not assume any obligation to update the information herein or correct any inaccuracy contained herein.

The Manager is registered as a portfolio manager in Ontario, Québec, British Columbia, Alberta, Manitoba and Newfoundland and Labrador, an exempt market dealer in each of the provinces of Canada and the Yukon and as an investment fund manager in Ontario, Québec, and Newfoundland and Labrador.

Additional information is available upon request.

Certain Disclosures Related to an Investment in the Access Fund:

Valuations. The net asset value of the Access Fund may be determined by their administrator in consultation with the Manager or its affiliates, or based on information from the Underlying Manager. Certain portfolio assets of the Underlying Fund may be illiquid and without a readily ascertainable market value and accuracy of valuations of other managers may be difficult to verify. Since the value assigned to portfolio securities affects a manager's or adviser's compensation, the Underlying Manager's or its affiliates' involvement in the valuation process creates a potential conflict of interest. The value assigned to such securities may differ substantially from the value the Underlying Fund (and as a result, the Access Fund) are able to realize. Instances of mispriced portfolios, due to fraud or negligence, have occurred in the industry. It may be difficult to value the Access Fund's interests in the Underlying Fund, upon which certain fees are based and upon which distributions or withdrawals, as applicable, will be calculated, because certain investments of the Underlying Fund may be illiquid, making, at times, fair market valuation impossible or impracticable.

Fees and Expenses. The Access Fund may be subject to substantial charges for management, advisory and/or brokerage fees. It may be necessary for those pools that are subject to these charges to make substantial trading profits to avoid depletion or exhaustion of their assets. Please refer to the Access Fund Offering Memorandum for a more complete description of risks and a comprehensive description of each expense to be charged by the Access Fund.

Limited Operating History. Unless otherwise indicated, the Access Fund has little, or no operating history or performance and this Fact Card may include performance which may not reflect actual trading of the Access Fund and should be reviewed carefully.

Important Information

Performance Data & Information. Any performance data or related derivative information displayed in this Fact Card is not indicative of future results. Investors should not place undue reliance on hypothetical, pro forma or predecessor fund performance. The Access Fund's actual performance may differ substantially and may be volatile and result in substantial or complete losses. Any information presented about other funds or selected investments made by the Underlying Manager or the Manager, while informative regarding the experience of the Underlying Manager and the Manager, are not indicative of, and in some cases may be irrelevant to, an assessment of the potential performance or investments of the Access Fund (in connection with its investment in the Underlying Fund). Performance of the Underlying Manager (including with respect to the Underlying Fund and/or its predecessors) is not that of the Manager or the Access Fund, and none of the Manager or its affiliates has approved or endorsed, or participated in the creation or preparation of, or edited in any manner, any such performance information.

Additionally, Underlying Fund performance data is not net of additional fees and expenses that will be charged at the Access Fund level. An investor in the Access Fund may suffer significant losses. Any losses by the Access Fund will be borne solely by the Access Fund's investors and not by the Manager or its affiliates.

Multiple Levels of Fees. The Access Fund imposes administrative or management fees, custodial, accounting and other service fees, as well as other expenses. As a result of the additional layer of fees at the Access Fund level, the returns of the Access Fund will be lower, and may be materially lower, than the returns at the Underlying Fund level. Investors in the Access Fund will experience lower returns than investors committing directly to the Underlying Fund as a result of the additional fees and expenses associated with an investment in the Access Fund.

Mismatched Performance. Although the Access Fund will invest substantially all of its assets in the Underlying Fund, the performance of the Access Fund may not track the performance of the Underlying Fund in lock-step and may differ materially as a result, for example, of funds invested in temporary investments by the Access Fund and delayed distributions by the Access Fund to its investors.

Returns on Unrealized Investments. Actual realized returns on unrealized investments will depend on, among other factors, future operating results, the value of the assets, and market conditions at the time of disposition, legal and contractual restrictions, any related transaction costs, and the timing and manner of sale, all of which may differ from the assumptions and circumstances on which the valuations used in the prior performance data contained in the Underlying Fund fact card are based. Accordingly, the actual realized returns on these unrealized investments may differ materially from the returns indicated therein. The value of investments can go down as well as up. In addition, there can be no assurance that unrealized investments will be realized at the valuations shown, as actual realized returns will depend on, among other factors, future operating results, the value of the assets and market conditions at the time of disposition, any related transaction costs, and the timing and manner of sale, all of which may differ from the assumptions on which the valuations contained herein are based.

Benchmarks & Indices: Any benchmarks or financial indices in this Fact Card are shown for illustrative purposes only and are provided for the purpose of making general market data available as a point of reference only. Such benchmarks and financial indices may not be available for direct investment, may be unmanaged, assume reinvestment of income, do not reflect the impact of any trading commissions and costs, management or performance fees, and have limitations when used for comparison or other purposes because they, among other reasons, may have different trading strategy, volatility, credit or other material characteristics. No representation is made that any benchmark or index is an appropriate measure for comparison.

The above summary is not a complete list of the risks, considerations and other important disclosures involved in investing in the Access Fund and is subject to the more complete disclosures in the Access Fund Offering Memorandum, which must all be reviewed carefully prior to making an investment.

UNLESS OTHERWISE INDICATED THEREIN, ANY PERFORMANCE SHOWN IN THE UNDERLYING FUND FACT CARD IS NOT THAT OF THE ACCESS FUND, AND PERFORMANCE SHOWN FOR THE UNDERLYING FUND IS NOT NET OF ADDITIONAL FEES AND EXPENSES THAT WILL BE CHARGED AT THE ACCESS FUND LEVEL OR ANY PLACEMENT FEE, IF CHARGED.

Such fees and expenses will reduce returns and, as such, the returns of the Access Fund will be lower, and may be materially lower, than the returns at the Underlying Fund level. Returns for the Access Fund may also differ from the returns of the Underlying Fund as a result of funds invested in temporary investments by the Access Fund and delayed distributions by the Access Fund to its investors.

In considering any performance data contained in this Fact Card, prospective investors should bear in mind that: (1) there can be no assurance that unrealized investments will be realized at the valuations shown, as actual realized returns on unrealized investments will depend on, among other factors, future operating results, the value of the assets, and market conditions at the time of disposition, legal and contractual restrictions, any related transaction costs, and the timing and manner of sale, all of which may differ from the assumptions and circumstances on which the valuations used in the prior performance data contained in the Underlying Fund fact card are based. Accordingly, the actual realized returns on any unrealized investments may differ materially from any unrealized returns indicated therein; (2) past or targeted performance is not indicative of future results, and there can be no assurance that the Access Fund or the Underlying Fund will achieve comparable results, and prospective investors should also bear in mind that past or targeted portfolio characteristics are not indicative of future portfolio characteristics and there can be no assurance that any fund will have comparable portfolio characteristics or that target portfolio characteristics will be achieved, and the value of investments can go down as well as up; and (3) benchmarks and financial indices are shown for illustrative purposes only and are provided for the purpose of making general market data available as a point of reference only. Such benchmarks and financial indices may not be available for direct investment, may be unmanaged, assume reinvestment of income, do not reflect the impact of any trading commissions and costs, management or performance fees, and have limitations when used for comparison or other purposes because, among other reasons, they may have different trading strategy, volatility, credit or other material characteristics. No representation is made that any benchmark or index is an appropriate measure for comparison.
