01-Dec-2025

What does the strategy invest in?

This strategy invests primarily in U.S. large-capitalization equities, leveraging GMO's long-term, valuation-driven approach to identify companies that are attractively priced relative to their fundamental value. The mandate focuses on high-quality businesses with durable competitive advantages, strong balance sheets, and consistent profitability. The strategy is designed to provide disciplined exposure to the U.S. equity market while aiming to deliver superior long-term, risk-adjusted returns.

How has the strategy performed?

Investment manager overview

GMO LLC (GMO) was founded in 1977 and is headquartered in Boston, Massachusetts. The firm is privately owned, allowing it to remain singularly focused on delivering strong long-term investment outcomes for clients. GMO manages approximately USD 71 billion in assets as of September 30, 2025, and operates as a global investment manager offering multi-asset, equity, fixed income, and alternative strategies. GMO’s organizational structure supports deep research specialization, with investment teams integrating fundamental, quantitative, and valuation-driven insights across mandates. A long-tenured group of investment professionals leads the firm, bringing decades of experience in applying GMO’s disciplined, valuation-based approach to market cycles. This stable ownership and experienced leadership team contribute to continuity in philosophy and process, reinforcing GMO’s commitment to achieving superior long-term results for its global client base.

Investment philosophy

GMO’s investment philosophy is rooted in a long-term, valuation-driven approach that seeks to deliver superior risk-adjusted returns by investing where the firm believes value is most compelling. This philosophy is built on the belief that markets can deviate from fair value in the short term but tend to revert toward fundamentals over time. As a result, GMO emphasizes patience, discipline, and a willingness to take a contrarian stance when valuations diverge meaningfully from their long-term norms.

GMO integrates both top-down and bottom-up perspectives, combining macroeconomic insights with rigorous security-level research. The firm’s investment teams use deep fundamental and quantitative analysis to identify attractively priced companies with durable competitive advantages, sound balance sheets, and sustainable long-term profitability. This disciplined valuation lens is applied consistently across asset classes—equities, fixed income, multi-asset, and alternatives—reflecting GMO’s commitment to long-term return generation.

Investment process and risk controls

GMO’s investment process applies its long-term, valuation-driven philosophy through a disciplined combination of fundamental and quantitative research. Investment teams begin by assessing broad market conditions and sector dynamics, then conduct deep company-level analysis to identify securities trading at meaningful discounts to their intrinsic value. Each candidate is evaluated for financial strength, sustainability of competitive advantages, and alignment with GMO’s long-term return expectations.

Once a security meets GMO’s valuation and quality thresholds, it becomes a portfolio candidate with defined expectations for forward returns. This valuation discipline acts as a risk control, helping teams avoid over-valued opportunities and ensuring every position is purchased with a margin of safety. After inclusion, holdings are continuously monitored for changes in fundamentals, valuation, or the investment thesis. Securities are reduced or sold when their valuations normalize, when fundamentals deteriorate, or when more attractive opportunities emerge.

GMO’s risk management is further supported by diversified portfolio construction, repeatable research frameworks, and a culture of independent oversight—reinforcing the firm’s commitment to delivering long-term, risk-conscious results for clients.

- One of Canada’s largest independent wealth management firms
- Parent company of Aviso Wealth, NEI Investments, and Qtrade
- Owned by Canada’s credit unions and Desjardins

¹ Blend – Combination of growth and value investment style

² Style represents the aggregate characteristics of the underlying holdings within this model. Market capitalization measures the aggregate market value of the outstanding shares of a company. Large-cap stocks are defined as the group that accounts for the top 70% of the capitalization of each geographic area; mid-cap stocks represent the next 20%; and small-cap stocks represent the balance.

The return data is as at December 31, 2025. Indicated rates of return are historical annual compounded total returns including reinvestment of all distributions for the period ended, and do not take into account management expenses, account sales, redemption, distribution or optional charges or income taxes payable by any security holder that would have reduced returns.

The information contained in this report was obtained from sources believed to be reliable; however, we cannot guarantee that it is accurate or complete. The Custom Managed Portfolios is distributed by Aviso Wealth Inc. Mutual funds and other securities are offered through Aviso Wealth Inc. Referral fees, commissions, management fees, and expenses all may be associated with managed accounts or the investments therein. Please read the prospectus before investing. Managed accounts, and the investments therein, are not insured nor guaranteed, their values change frequently and past performance may not be repeated.

⁵ The benchmark is SP500TR

Aviso Wealth Inc. ('Aviso') is a wholly owned subsidiary of Aviso Wealth LP, which in turn is owned 50% by Desjardins Financial Holding Inc. and 50% by a limited partnership owned by the five Provincial Credit Union Centrals and The CUMIS Group Limited.
