Investment manager overview

Dixon Mitchell was formed in June of 2000 by a small group of principals with the goal of providing sound asset management to mid and high net worth individuals. The team coalesced with a vision of offering investment management and client service at a level not generally achieved in a sprawling corporate environment.

Today, they are comprised of a focused group of individuals who bring diverse talents and experience to both the security selection and portfolio construction aspects of investment management.

Investment philosophy

Dixon Mitchell's investment approach is geared toward generating strong, absolute returns independent of market conditions and recognizes the importance of risk management to long term performance. Stocks are evaluated based on their valuation and ability to generate and grow cash flow and all securities must meet their tests for equitable corporate governance. The objective of the Total Equity mandate is to achieve long term capital growth supplemented by dividend income attained through the investment in a diversified basket of Canadian and foreign large-cap equities.

Investment process and risk controls

Fundamental to this philosophy is Dixon Mitchell's equity screening process:

Qualitative Attributes:

1. Sustainable competitive advantage
2. Positive industry fundamentals
3. Equitable corporate governance

Quantitative Evaluations:

1. High return on invested capital
2. Current dividend yield / trend
3. Cash flow strength

Through this analysis, Dixon Mitchell evaluates each equity holding as a business. If that business is not run by management whose interests are aligned with theirs, or if it does not generate a true investment return through cash flow and dividends, it is not a candidate for the Dixon Mitchell portfolios. These rigorous standards, along with their unwillingness to overpay for a company, produce stable long-term performance and portfolios that stand the test of time.

- One of Canada's largest independent wealth management firms
- Parent company of Aviso Wealth, NEI Investments, and Qtrade
- Owned by Canada's credit unions and Desjardins

¹ Blend – Combination of growth and value investment style

² Style represents the aggregate characteristics of the underlying holdings within this model. Market capitalization measures the aggregate market value of the outstanding shares of a company. Large-cap stocks are defined as the group that accounts for the top 70% of the capitalization of each geographic area; mid-cap stocks represent the next 20%; and small-cap stocks represent the balance.

³ The return data is as at December 31, 2025. Indicated rates of return are historical annual compounded total returns including reinvestment of all distributions for the period ended, and do not take into account management expenses, account sales, redemption, distribution or optional charges or income taxes payable by any security holder that would have reduced returns.
