Guardian Capital

Portfolio manager:

Aviso Wealth

Minimum investment:

\$150,000

Inception Date:

01-Jul-1996

What does the strategy invest in?

This strategy invests in bonds with an average credit rating of "A" or higher and a duration which fluctuates within a narrow range. It attempts to add value by purchasing bonds that are mis-priced relative to their credit fundamentals and by anticipating changes in the direction of interest rates. It's equity mandate is based on an equity blend style, GARP (growth at a reasonable price), which emphasizes companies with highly visible, above average growth prospects that are not yet reflected in the price of a company's stock.

How has the strategy performed?

Average annual compound returns

	3 month	YTD	1 yr	3 yr	5 yr	10 yr	SI

GUARDIAN CAPITAL LP

Investment manager overview

Guardian was formed in 1962 and is one of Canada's longest-established, independent investment counselling firms. Over its 50-year history, Guardian has offered its investment management expertise in balanced fund management, equity management and fixed-income management to pension fund clients, institutions, operating and endowment funds, charitable organizations, mutual funds and high net worth individuals. Guardian Capital Inc. is wholly-owned by Guardian Capital Group Limited. The parent company's common and non-voting Class A shares are listed on the Toronto Stock Exchange.

Investment philosophy

Guardian's investment philosophy is to achieve a prudent balance between risk tolerance and return enhancement. This balance is key to successful longer-term performance. Guardian also believes that longer term success will be achieved through fundamental research, superior security selection and implementation of a disciplined approach. They utilize both a "bottom-up" and "top-down" approach for portfolio construction with primary emphasis on a "bottom-up" process.

Investment process and risk controls

The Canadian Balanced mandate is designed as a well-diversified mandate by sector/industry and security selection with a "growth-at-a-reasonable-price" style. Guardian seeks out companies which have the potential to grow sales (top-down) and earnings (bottom-up) faster than the economy, faster than their peer group and faster than the market as a whole. They focus on companies which will provide a fairly stable and predictable earnings path in the future. Within the bond component they attempt to add value by purchasing bonds that are mis-priced relative to their credit fundamentals and by anticipating changes in the direction of interest rates.

The overall emphasis combines a bottom-up view (approximately 80%) with a top-down view (approximately 20%). Individual equity security selection is based on in-depth knowledge of each company through a proprietary screening process (which includes an SRI screening). The top-down approach includes a thematic (i.e., demographics, technology, globalization, etc.) outlook for the economic, social and political trends which might affect the market as a whole and the underlying sectors, industries and securities within the market.

Risk management is an integral part of the decision-making process. They seek out companies which have strong balance sheets, superior management teams and a catalyst which is expected to have a positive impact on price performance over time.

- One of Canada's largest independent wealth management firms
- Parent company of Aviso Wealth, NEI Investments, and Qtrade
- Owned by Canada's credit unions and Desjardins

¹ GARP (Growth at a reasonable price)

² Style represents the aggregate characteristics of the underlying holdings within this model. Market capitalization measures the aggregate market value of the outstanding shares of a company. Large-cap stocks are defined as the group that accounts for the top 70% of the capitalization of each geographic area; mid-cap stocks represent the next 20%; and small-cap stocks represent the balance.

³ Duration measures the sensitivity of the fixed income investments to interest rate changes measured in years. In general, the longer the duration, the more sensitive the investment will be to interest rates changes. Credit quality measures the underlying issuer's ability to repay their debt.

The return data is as at December 31, 2025. Indicated rates of return are historical annual compounded total returns including reinvestment of all distributions for the period ended, and do not take into account management expenses, account sales, redemption, distribution or optional charges or income taxes payable by any security holder that would have reduced returns.

The information contained in this report was obtained from sources believed to be reliable; however, we cannot guarantee that it is accurate or complete. The Custom Managed Portfolios is distributed by Aviso Wealth Inc. Mutual funds and other securities are offered through Aviso Wealth Inc. Referral fees, commissions, management fees, and expenses all may be associated with managed accounts or the investments therein. Please read the prospectus before investing. Managed accounts, and the investments therein, are not insured nor guaranteed, their values change frequently and past performance may not be repeated.

⁵ The benchmark is 60% S&P/TSX Composite TR Index; 40% FTSE Canada Universe Bond Index

Aviso Wealth Inc. ('Aviso') is a wholly owned subsidiary of Aviso Wealth LP, which in turn is owned 50% by Desjardins Financial Holding Inc. and 50% by a limited partnership owned by the five Provincial Credit Union Centrals and The CUMIS Group Limited.
