Relative Value ¹

Number of holdings:

69

Sub-advisor:

Lazard Asset Management

Portfolio manager:

Aviso Wealth

Minimum investment:

\$150,000

Inception Date:

01-Jul-2013

What does the strategy invest in?

The Lazard International Equity strategy seeks to generate strong relative returns over a full market cycle by investing in companies with strong and/or improving financial productivity at attractive valuations. The strategy typically invests in non-US companies, including those from emerging markets, with a market capitalization generally of \$3 billion or greater..

How has the strategy performed?

Average annual compound returns

	3 month	YTD	1 yr	3 yr	5 yr	10 yr	SI

Investment manager overview

Since 1848, Lazard has remained a trusted advisor to governments, financial institutions, public and private retirement plans, and individuals around the world.

Lazard Asset Management is the principal asset management subsidiary of Lazard Ltd., and today represents approximately half of the firm's revenue. With more than 300 investment personnel in 18 cities across 13 countries, Lazard Asset Management offers investors an array of traditional and alternative investment solutions. We believe our global reach, unique identity, diverse product platform, and strong client relationships will allow us to maintain our preeminent position in the marketplace.

Investment philosophy

Lazard's investment philosophy is based on value creation through the process of bottom-up stock selection. Our relative value philosophy is implemented by assessing the relationship between valuation and financial productivity for an individual security. We believe that financial productivity (the return a company generates) measures how effectively a company is putting its shareholders' capital to work – and ultimately this drives valuation. Assessing a company's financial productivity is an important part of our research process, as it is critical to assessing a company's value.

We believe that the best companies often sustain higher levels of financial productivity for longer than the market expects, leading to valuation opportunities and market inefficiencies. We also believe that opportunities exist among companies to improve returns, but less often than investors.

Investment process and risk controls

After the initial research process, stocks are selected by the portfolio management team from the wide range of ideas generated by Lazard's global equity investment professionals. For a stock to be purchased in the strategy, an investment thesis is prepared which typically covers a wide range of factors, such as: business analysis, including direction and sustainability of returns; financial modeling, including accounting validation and detailed valuation work; research edge, and what factors will make the market correct its valuation of the stock; and finally, key investment risks.

This thesis is formally documented but more importantly, it is tested rigorously through discussions with the portfolio management team. The team is usually involved in company meetings and often requires further information and analysis before reaching a conclusion. The portfolio management team and analysts work closely together to build conviction on investment ideas, creating a team culture that helps to optimize decision making.

Lazard uses a three-tiered approach to risk management, which begins during the research process. In addition to accounting validation, the portfolio management team considers corporate governance, the overall macroeconomic environment, as well as political factors that could impact each company considered for purchase

- One of Canada's largest independent wealth management firms
- Parent company of Aviso Wealth, NEI Investments, and Qtrade
- Owned by Canada's credit unions and Desjardins

¹ Relative Value – Investing style that focuses on relative company to competitor value, in addition to absolute and intrinsic value

² Style represents the aggregate characteristics of the underlying holdings within this model. Market capitalization measures the aggregate market value of the outstanding shares of a company. Large-cap stocks are defined as the group that accounts for the top 70% of the capitalization of each geographic area; mid-cap stocks represent the next 20%; and small-cap stocks represent the balance.

The return data is as at December 31, 2025. Indicated rates of return are historical annual compounded total returns including reinvestment of all distributions for the period ended, and do not take into account management expenses, account sales, redemption, distribution or optional charges or income taxes payable by any security holder that would have reduced returns.

The information contained in this report was obtained from sources believed to be reliable; however, we cannot guarantee that it is accurate or complete. The Custom Managed Portfolios is distributed by Aviso Wealth Inc. Mutual funds and other securities are offered through Aviso Wealth Inc. Referral fees, commissions, management fees, and expenses all may be associated with managed accounts or the investments therein. Please read the prospectus before investing. Managed accounts, and the investments therein, are not insured nor guaranteed, their values change frequently and past performance may not be repeated.

⁵ The benchmark is MSCI EAFE NR Index (CAD)

Aviso Wealth Inc. ('Aviso') is a wholly owned subsidiary of Aviso Wealth LP, which in turn is owned 50% by Desjardins Financial Holding Inc. and 50% by a limited partnership owned by the five Provincial Credit Union Centrals and The CUMIS Group Limited.
