Investment manager overview

Manning & Napier Advisors, LLC (Manning & Napier) was established in 1970 and is based in Fairport, New York, with offices and in Dublin, Ohio and St. Petersburg, Florida. Manning & Napier is a Delaware Limited Liability Company. A majority of the company is beneficially employee-owned, while 17.1% is currently publicly owned. Employee shareholders are a blend of youth and experience which provides for continuity going forward. William Manning, Co-Founder of Manning & Napier, is the Chief Executive Officer. An Operating Committee made up of senior executives averaging more than 20 years with Manning & Napier is responsible for the day-to-day operations of the Firm. In total, the Firm currently has in excess of 400 employees.

Investment philosophy

Manning & Napier's equity investment approach is based on a combination of qualitative company selection strategies and a strict pricing discipline. Implementation of this approach involves an interaction between top-down, macroeconomic analysis, and bottom-up industry analysis and securities selection.

Manning & Napier's in-house team of equity analysts relies upon three broad equity strategies: Strategic Profile, Hurdle Rate, and Bankable Deal. The Strategic Profile strategy focuses on companies positioned for strong future growth but whose valuations do not reflect their potential. This strategy brings together the strategic positioning of the company, its growth prospects, and the appropriate price to pay for those prospects. The Hurdle Rate strategy looks at companies that are in depressed sectors, but are strong enough to survive the hard times, and are likely to lead the rebound of their industry when supply/demand conditions improve. The Bankable Deal strategy takes an in-depth look at the assets and cash flow of a company to reveal value that is not reflected in the stock's price. This strategy focuses on under-appreciated, often under-utilized, assets on which the market is placing little or no value and also looks for possible catalysts to highlight or unlock this value.

Investment process and risk controls

The Firm's analysts review opportunities in various market sectors and in looking for a strategy fit, deploy the proprietary strategies mentioned above to select equities. Once a security has been identified as a portfolio candidate, a buy price is set. This pricing discipline sets stringent guidelines for analysts to follow and the dual focus on investment strategies and valuation has been effective at identifying attractive investment opportunities while forcing them to avoid overvalued situations. Once a stock is purchased, it is closely monitored and sold once the pre-determined sale price (i.e., fair market value) is met, the selection no longer corresponds to the strategy fit it was chosen under, or they determine there is a more compelling idea at a better value. However, if the strategy fit remains intact, Manning & Napier may consider taking advantage of a decline in the security's price and buy more of the security.

¹ Blend – Combination of growth and value investment style

² Style represents the aggregate characteristics of the underlying holdings within this model. Market capitalization measures the aggregate market value of the outstanding shares of a company. Large-cap stocks are defined as the group that accounts for the top 70% of the capitalization of each geographic area; mid-cap stocks represent the next 20%; and small-cap stocks represent the balance.

The return data is as at December 31, 2025. Indicated rates of return are historical annual compounded total returns including reinvestment of all distributions for the period ended, and do not take into account management expenses, account sales, redemption, distribution or optional charges or income taxes payable by any security holder that would have reduced returns.
